

THANK YOU FOR STOPPING BY!

Wow! We had a great turnout at the Perfect Point booth last week during MRO Americas in Orlando, Florida. Our entire staff sends their appreciation for your interest in our game-changing Fastener Separation Technology (E-Drill), and aerospace coating removal system (S-Blaster).

We had an opportunity to demonstrate our revolutionary technology to attendees ranging from maintenance technicians, senior program managers and Military officials, and received some amazing feedback:

- "Where were you 30 years ago?"
- "8-10 second cut times on Titanium HI-Loks. I can't believe my eyes!"
- "We were hesitant at first...it was a big purchase, but E-Drill has changed the way we do our work!"
- "Every Airline, OEM, and MRO needs one of these!"
- "Our Work-Force Loves this Product!"
- "I have been and will always be a true believer in this product. We can't imagine operating without it."
- "So - Show me this magic drill everyone is talking about!"

Our existing customer base continues to be our biggest fans and advocates. Those newly introduced to the technology were instantly impressed by the productivity improvements and cost-savings that are now possible. The E-Drill system and family of fastener removal tooling were the Must-See Products of the show.

Perfect Point's line of revolutionary fastener removal solutions are changing the way heavy-structural maintenance, repair, and overhaul is performed in the 21st Century.

If you didn't get a chance to see our LIVE demonstrations, what we do is:

- Reduce AOG Turnaround-Time
- Reduce Labor Time and Cost
- Reduce Damage
- Reduce Material Cost
- Eliminate FOD
- Eliminate Personal Injury
- Eliminate Exposure to Hazardous Waste

So - What's next? We're throwing this party again at:

TINKER AND THE PRIMES

Midwest City, OK
21-23 August 2017

C-130 TCG
Charleston, SC
23-24 October 2017

But can you afford to wait that long?
