

Faster Fastener Removal

The new e·drill EG (external ground) from Perfect Point is able to remove fasteners down to 3/32"

The new e·drill EG (external ground) offers the following benefits vs. conventional drilling:

1. **Productivity Improvement -**
At least five times faster on hard metal fasteners
2. **Improved Ergonomics -**
The process is forceless, whereas drilling exposes operators to all ergonomic risk factors
3. **Foreign Object Debris -**
FOD collection is much easier. Total elimination of drill shards means fewer operator injuries
4. **Air Frame Safe -**
90%+ reduction in damage rates
