

Revolutionizing Maintenance, Repair, and Overhaul: ONE FASTENER AT A TIME

E-DRILL'S "10 SECOND" TITANIUM FASTENER SEPARATION TECHNOLOGY took the audience by storm at the 2017 F-16 and Proven Aircraft TCG Worldwide Review in Ogden, Utah.

Attendees were met with wonder and awe as the Perfect Point team demonstrated E-Drill's captivating Fastener Separation Technology (FST) on a continual basis to Military Officials both Foreign and Domestic, Engineers, Technicians, Distributors and the list goes on. Everyone wanted to come and see what they have been hearing about; the "magic" that takes place in our patented EDM technology. E-Drill did NOT let them down.

*"I've always tried to bring in new and exciting technology. I LOVE this thing, and I hope the entire Air Force gets them."* – Retired Engineer

*"Just like that, two clean pieces left over with very little knock out force."* – Program Manager

*"I wish we brought more structures guys to come and see E-Drill. They would be looking at me funny for not having one already."* – Planning Ops Supervisor

Thank you to all who came out to witness the *FUTURE* of fastener removal in the aerospace market. Please come and see us at our last two shows of the year:

**23-24 October 2017**

C-130 TCG  
Charleston, SC (Booth 401)

**14-17 November 2017**

Logistics Officer Association (LOA)  
Symposium  
Washington, DC (Booth 335)

**What We Do:**

- Reduce AOG Turnaround-Time
- Reduce Labor Time and Cost
- Reduce Damage
- Reduce Material Cost
- Reduce Work-Force Training Time
- Eliminate FOD
- Eliminate Personal Injury
- Eliminate Exposure to Hazardous Waste
- Eliminate Noise Pollution
