

Revolutionizing Maintenance, Repair, and Overhaul: ONE FASTENER AT A TIME

THE F-15 COMMUNITY REACTED WITH WONDER as the E-drill was demonstrated over and over again at this years F-15 TCP WWR in Miramar Beach, FL.

President and CEO of Perfect Point Larry Harrell (pictured) gave an outstanding presentation on the benefit of using E-drill for MRO work being performed on aircraft engines and structures alike. The F-15 is going through a large series of modification work currently to

ensure it remains as the choice for air superiority. E-drill has a proven record of low damage rate and reducing the Non-Mission Capable Status that plagues our Nations fighters. Leaders from multiple countries were able to see how E-drill will assist in MRO and readiness and continue to assist in keeping their F-15's in the air well into the 2030's.

“Amazing, guys! Absolutely incredible! You guys really just made my day by showing me your technology.” – Consultant

“I can see a huge benefit to MODs by using your technology all over F-15, both USAF and FMS.” – Program Manager

“You guys have the best both at the whole show! Your technology is amazing, it’s crazy that every unit doesn’t have at least one of these.” – Maintenance Director

What We Do:

- Reduce AOG Turnaround-Time
- Reduce Labor Time and Cost
- Reduce Damage
- Reduce Material Cost
- Reduce Work-Force Training Time
- Eliminate FOD
- Eliminate Personal Injury
- Eliminate Exposure to Hazardous Waste
- Eliminate Noise Pollution

Thank you to all who came out to witness the *FUTURE* of fastener removal in the aerospace market. Please come and see us at our final show of the year:

Aircraft Structural Integrity Program Conference (ASIP)

November 26-29, 2018
Phoenix, AZ
