

E-drill Steals the Spotlight at AMC!

Perfect Point and Ntegrity Celebrate United Airlines as Winner at the 2019 Aerospace Maintenance Competition

The E-drill Fastener Removal Event was a top hit according to most of the 449 Technicians competing in the 2019 Aerospace Maintenance Competition. The event tested each competitor's ability to remove 5 titanium Composi-Lok type fasteners from a refurbished composite Global 5000 Flap. United Airlines – Base Maintenance was the fastest team to complete this event, doing so in 2 minutes 49 seconds.

The E-drill's exciting first year at the competition had the contestants talking and was flagged as one of the "Cool Events to See at the AMC" by [Aviation Pros AMT Magazine](#).

Here's what some of the competitors said:

"I've been a structures mechanic for over 10 years... and I've wasted a lot of time because I didn't have this tool. It's clean, you don't mess anything up, I really wish I would've had this tool"

*"... my favorite event in the Competition. You **HAVE** to come back next year"*

*"Where were you **30 years ago**?" "This is an amazing product."*

Perfect Point's innovative solutions are revolutionizing how structural maintenance is performed in the 21st Century. These exciting tools are quickly becoming the industry standard by reducing MRO costs through increased productivity, damage avoidance, ergonomics, and lower consumables costs.

If you are interested in learning more about ways to:

- **Improve your AOG Turnaround-Time**
- **Reduce Labor Time and Cost**
- **Mitigate Damage**
- **Improve Production Quality**
- **Reduce Material Cost**
- **Eliminate FOD**
- **Reduce Hazardous Waste**
- **Reduce the Ergonomic Tax on your Workers**
