

ATTENDEES WERE TRULY AMAZED as they witnessed the groundbreaking E-drill technology at MRO Americas 2019 in Atlanta Georgia. There was a great turnout at the Perfect Point booth 1315 to see our revolutionary Fastener Separation Technology (**E-Drill**), and Aerospace Coating Removal System (**S-Blaster**).

Our existing customer base continues to be our biggest advocates, while those newly exposed to the technology were instantly impressed by the productivity improvements and cost-savings that are now possible. The E-Drill system and family of fastener removal tooling was the **Must-See Product** of the show.

We received some amazing feedback:

“What you are showing here is just the sort of thing the aerospace industry needs” – Director of Maintenance

“Your booth is easily the most exciting booth at the show.” – Program Manager

“We could easily use this at every one of our component shops around the U.S.” – General Manager

“We could use at least 2 of these for every station in our heavy check hangar, maybe more!” –Director of Quality

“What an amazing technology – I know of 5 places already that would really benefit from your technology” – Senior Manager - Hangar Maintenance

“Your technology is so easy to use, I am going to bring this back to my school and then wherever I go after that!” – A & P Student

If you are interested in learning more about ways to:

- **Improve your AOG Turnaround-Time**
- **Reduce Labor Time and Cost**
- **Mitigate Damage**
- **Improve Production Quality**
- **Reduce Material Cost**
- **Eliminate FOD**
- **Reduce Hazardous Waste**
- **Reduce the Ergonomic Tax on your Workers**
