

THE EXCITEMENT GREW as spectators gathered around to witness Perfect Point's technology at Tinker and the Primes 2019 trade show in Oklahoma City, Oklahoma. The Perfect Point booth saw a great turnout from interested attendees and remained the talk of the show through the three days of exhibition.

Attendees were immediately impressed by the obvious efficiency and cost-savings benefits that made possible by the E-drill family of fastener removal tools. Perfect Point President and CEO, Larry Harrell (Pictured Below), further stressed the need for such efficiency improvements in the industry as he presented about changes in the workforce and the necessity to ramp up innovation adoption rates to keep up.

We received some amazing feedback:

"ROI has to be fast with tooling like this" – Director of Maintenance

"Your booth definitely has the most action at this show" – Program Manager

"It's so easy to use, that's really cool!" – General Manager

*Thank you to all who came out to witness the **FUTURE** of fastener removal in the aerospace market!*
