

Revolutionizing Maintenance, Repair, and Overhaul: ONE FASTENER AT A TIME

SPECTATORS MARVELED at the E-drill's speed and efficiency during the 2019 Logistics Officer Association (LOA) in Oklahoma City, Oklahoma this week. The Perfect Point booth gathered dozens of attendees interested in the newest innovations from the only company focused on providing a better solution to fastener removal.

The LOA Symposium was "this year's premier event dedicated to enabling interactive exchanges among logistics, acquisition and technology professionals from across the Department of Defense, defense industry and academia." The focus for the 2019 symposium was Increasing Lethality Today, Readiness for Tomorrow's Fight. E-drill has a proven record of decreasing maintenance time and increasing mission capable status. Attending Logisticians at all levels of leadership were amazed by the clear benefits of the E-drill and immediately recognized the possible impact it could have on increasing readiness for tomorrow's fight.

We received some amazing feedback:

"You made it so simple. We NEED one of these in our shop" – Maintenance Officer

"This could have saved us countless times. It's hard to imagine how bad some people mess up such a simple task" – Maintenance Group Commander

"I really can't understand why we don't have one of these already." – General Manager

Thank you to all who came out to witness the FUTURE of fastener removal in the aerospace market!

If you are interested in learning more about ways to:

- **Mitigate Damage**
- **Reduce Labor Time and Cost**
- **Eliminate FOD**
- **Reduce Material Cost**
- **Improve Production Quality**
- **Reduce the Ergonomic Tax on your Workers**
- **Reduce Hazardous Waste**
- **Improve your AOG Turnaround-Time**
